To whom it may concern:

Subject: Certificate of Compliance

The purpose of this letter is to certify that the Kosmos Type I,II portland cement with an equivalent alkali content above 0.60%, and the Type I,II portland cement and Type III portland cement with equivalent alkali contents below 0.60% (traditionally referred to as Low Alkali cement, or LA) produced at our plant in Louisville, KY are manufactured to comply with the requirements of ASTM C150-20, "Standard Specification for Portland Cements".

The chemical and physical properties of the products labeled as Type I,II fully comply with the requirements in C150 for both Type I and Type II cement. The Cement Mill Test Reports and Certificate of Compliance are used to certify the portland cement products which are manufactured, tested and verified to meet the criteria in the C150 specification. Other descriptive labels on packaged products or the Bill of Lading may be truncated for purposes of simplification or limitations on the number of characters displayed in various computer software programs. Please refer to the information contained in our certification documents for clarification of the material description and related properties.

As Kosmos Cement Company has no control over other ingredients mixed with this product or the final application, Kosmos Cement Company does not and cannot warrant the finished work. The user is responsible for following industry standards and recommended practices.

Should you have any questions or require any additional information, please contact me at your convenience.

Respectfully,

A handwritten signature in black ink that reads "Tom Kyser".

Tom Kyser
